

GENTLE on SKIN... STRONG on PERFORMANCE

Scapa Medical Silicone Gel Adhesives

Scapa Medical advanced silicone gel adhesives are ideal for use in a variety of skin contact applications. They're suitable for use on the most sensitive skin and will remove easily without causing skin trauma. Their water-resistant properties allow them to remain in place when submerged in water, yet be removed for washing. Once properly dried, the adhesives will regain their adhesion, allowing them to be re-applied.

Product Benefits

- Facilitates healing
- Removes easily without causing skin trauma
- Reduces discomfort
- Water resistant
- Conformable and repositionable for difficult body contours
- Washable with water
- Regains adhesion after drying for re-use

Typical Applications

- Neonatal care
- Wound care
- Medical device attachment
- Non-adherent dressings
- Reduction of hypertrophic scarring
- Treatment of burns and pressure sores
